

"Danger of flooded road"

Typhoon, explosive cyclone, and localized torrential rainfall are increasing day by day.

The places where we feel safe in daily life turn into dangerous places when they are flooded suddenly.

Guardrails, manhole covers, gutter and fallen bicycles become invisible by flooded muddy water.

And it will risk your life when you stumble or fall into a manhole which is opened by water-pressure.

Keep away from flooded places and try to stay at home when there is a heavy rainfall.
